**INNOVA**

Education

Virgo Fidelis Convent Senior School is committed to providing an outstanding learning environment to students of all faiths aged 11-18. As part of ongoing refurbishment works, Innova has completed the design and installation of an inspirational 'masterchef style' food technology room.

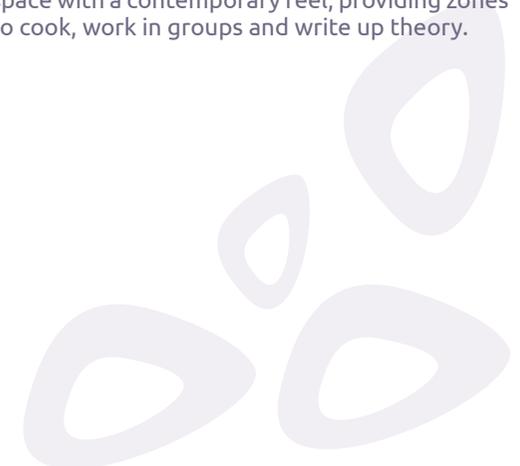

### Brief

Food Technology rooms are active, working environments that require stringent Health and Safety standards and purpose built installations, to accommodate both practical and theory based lessons.

Students need the flexibility to analyse, prepare and cook food as well as study theoretical topics such as diet and nutrition.

Our brief was to refurbish the old technology room and transform it into a bright, modern space with a contemporary feel, providing zones to cook, work in groups and write up theory.

# Virgo Fidelis Convent School London

Carcase		Manufactured from 18mm MF MDF		Seating		Ergonomic stools
Worktops		Solid Surface		Handles		Zinc alloy D handles
Edging		ABS Colour matched edging		Hinge		240° pivot safety hinges

## Solution

As part of the design process Innova developed the layout of the room, to maximise space for both teaching and learning.

We paid particular attention to flexible work stations, integrated units, storage solutions and overall a space that was practical in a busy environment.

Durable and high quality solid surface worktops, resistant to water heat and impact were used throughout to create an environment that is hygienic and easy to maintain over time.

Pastel greens and light work benches create a bright and airy feel to the room. A wood-effect non-slip flooring added a contemporary twist to the design, taking inspiration from the Masterchef's kitchen.

Innova's food technology refurbishments are designed to support and inspire learning.

From flexible workstations to integrated units, storage solutions and teachers walls, we create the perfect classroom – leaving students to cook up a storm.
